Zahalak, G. I 28
Zajac, S. 96
Ziegert, J. C. 218

Vol. 101, 1979 SUBJECT INDEX

Accelerometers 213
Aortic arch 96
Arteries
  stenosis 89, 141, 157
Atherosclerosis 73, 89, 96

Blood 213
Blood cell suspensions, stability 289
Blood flow 96, 198, 289
  measurement by heat transients 58
  curved tube 114
  stenosis 141, 157
  thermography and perfusion 246
Bone
  cortical 112
  femurs 193
  vibration 218

Circulatory assist devices 114
Constitutive equation
  ligament 15
  inversion of stress-strain relation 23
  lung tissue 38
  lumbar spine 46, 53
  femurs 193
Couette flow 289
Counterpulsation 105

Dynamics
  counterpulsation 105
  motion analysis 279

Elasticity
  ligament 15
  lung tissue 38
  inversion of stress-strain 23
  lumbar spine 46, 53
  femurs 193
Erythrocytes 213

Fatigue strength 112
Femurs 193
Finite element method 176

Frequency response
  muscle 28
  bone 112

Gait analysis 205

Head injuries 250
Heart valve 198
Hemolysis 213
Hyperthermia 151, 213

Impact injuries 250
Implantation materials 2
Intestine 284

Joint lubrication 185

Knee 134

Laser doppler velocimetry 267
Left ventricle 221, 225
Leg 176
Ligament 15
  constitutive equation 15
Lubrication 185

Mechanical properties, see elasticity
  constitutive equation
  knee 134
Microwave applicator 151
Morphology
  lumbar spine 53
Motion analysis 205, 279
Muscle
  skeletal 28
  heart 225
  intestine 284

Ocular tonometry 267

Perfusion measurement
  by thermography 246

Peristaltic pumping 239
Pulsatile flow 141, 198

Shoulder 271
Simulation
  counterpulsation 105
Skin
  temperature probe 232, 261
  disk sensor 261
Small intestine 284
Spectral characteristics
  post-stenotic turbulence 89
Spine
  lumbar 46
Stenosis 89, 141, 157
Stereoscopic instrumentation 124
Stress analysis 225
Stress-strain relationship
  inversion 23
  ligament 15
  lung tissue 38
  lumbar spine 46, 53
  knee 134
Synovial fluid 185

Temperature distribution
  at electrode sites 66
  perfused medium 82
Temperature measurements 58, 66, 151, 232, 246
  skin 261
Thermography 246
Tonometry, ocular, 267
Turbulent flow
  in arteries 89

Ultrasound
  assessment of atherosclerosis 73

Vibration
  of bone 218

Wrist 124

Vol. 101, 1979 TABLE OF CONTENTS

1 New Technical Editor

2 Materials for Human Implantation
W. Rostoker and J. O. Galante

15 A Constitutive Equation for the Canine Anterior Cruciate Ligament
D. N. Bingham and P. H. DeHoff

23 Inversion of a Class of Nonlinear Stress-Strain Relationships of Biological Soft Tissue
Y. C. Fung

28 A Quantitative Equation of the Frequency-Response Characteristics of Active Human Skeletal Muscle in Vivo
G. I. Zahalak and S. J. Heyman

38 Constitutive Equation of Lung Tissue Elasticity
D. L. Vawter, Y. C. Fung, and J. B. West

46 Mechanical Properties of Human Lumbar Spine Motion Segments – Part I: Response in Flexion, Extension, Lateral Bending, and Torsion
A. B. Schultz, D. N. Warwick, M. H. Berkson, and A. L. Nachemson

53 Mechanical Properties of Human Lumbar Spine Motion Segments – Part II: Responses in Compression and Shear; Influence of Gross Morphology
M. H. Berkson, A. Nachemson, and A. B. Schultz

58 Blood Perfusion Measurements by the Analysis of the Heated Thermocouple Probe's Temperature Transients
W. R. Johnson, A. H. Abdelmessih, and J. Grayson

66 Measurements of Temperature Distributions at Electro-Surgical Dispursive Electrode Sites
K. M. Overmyer, J. A. Pearch, and D. P. DeWitt

73 Ultrasonic Assessment of Simulated Atherosclerosis; In-Vitro and In-Vivo Comparisons
E. R. Greene and M. B. Histand

82 Transient Temperature Distributions in an Infinite, Perfused Medium due to a Time-Dependent, Spherical Heat Source
R. K. Jain

89 Spectral and Temporal Characteristics of Post-Stenotic Turbulent Wall Pressure Fluctuations
W. H. Pitts and C. F. Dewey, Jr.

96 Effect of Aortic Arch Atherosclerotic Formations on Blood Mass Flow Distribution
Cz. M. Rodkiewicz, S. Zajac, W. T. Jedruch, and W. T. M. Hsieh

105 A Simulation of the Dynamics of Counterpulsation
A. Nerz, P. D. Myerowitz, and P. L. Blackshear, Jr.

112 The Influence of Stress Frequency on the Fatigue Strength of Cortical Bone
J. F. Lafferty and P. V. V. Raju

114 Analysis of Fully Developed Unsteady Viscous Flow in a Curved Elastic Tube Model to Provide Fluid Mechanical Data for Some Circulatory Path Physiological Situations and Assist Devices (78-WA/Bio-1)
K. B. Chandran, R. R. Hosey, D. N. Ghista, and V. W. Vayo

124 Kinematic and Kinetic Analysis of the Human Wrist by Stereoscopic Instrumentation (78-WA/Bio-3)
A. G. Erdman, J. K. Mayfield, F. Dorman, M. Wallrich, and W. Dahlof

134 Effects of Fixed Axes of Rotation of the Varus-Valgus and Torsional Load-Displacement Characteristics of the In-Vitro Human Knee (78)WA/Bio-4)
J. Rastegar, R. L. Piziali, D. A. Nagel, and D. J. Schurman

141 Investigation of a Pulsatile Flowfield Downstream from a Model Stenosis (78-WA/Bio-6)
J. T. Cox, J. D. A. van Hoften, and Ned H. C. Hwang

151 Thermal Analysis and Design Considerations for a Dual-Beam Microwave Applicator for Hyperthermia Research (78-WA/Bio-7)
R. J. Hannemann and J. E. Robinson

157 Fluid Mechanics of Arterial Stenoses
D. F. Young

176 A Dynamic, Nonlinear Finite-Element Model of a Human Leg (78-WA/Bio-2)
T. K. Hight, R. L. Piziali, and D. A Nagel

185 A Proposed Model of Boundary Lubrication by Synovial Fluid: Structuring of Boundary Water
W. H. Davis, Jr., S. L. Lee and L. Sokoloff

193 Determination of Elastic Constants for Human Femurs
V. G. Lappi, M. S. King, and I. Le May

193 Numerical Study of the Steady Axisymmetric Flow Through a Disk-Type Prosthetic Heart Valve in an Aortic-Shaped Chamber
F. N. Underwood and T. J. Mueller

205 A Gait Analysis Subsystem for Smoothing and Differentiation of Human Motion Data
M. D. Lesh, J. M. Mansour, and S. R. Simon

213 Time Progression of Hemolysis of Erythrocyte Populations Exposed to Supraphysiological Temperatures
N. A. Moussa, E. N. Tell, and E. G. Cravalho

218 The Effect of Soft Tissue on Measurements of Vibrational Bone Motion by Skin-Mounted Accelerometers
J. C. Ziegert and J. L. Lewis

221 Technical Brief
Geometric Modelling of the Human Left Ventricle
A. L. Yettram and C. A. Vinson

225 Contractile Filament Stress in the Left Ventricle and its Relationship to Wall Stress
E. S. Grood, C. A. Phillips, and R. E. Mates

232 Skin Temperature Probe
S. D. Mahanty and R. B. Roemer

239 Peristaltic Pumping by a Lateral Bending Wave
D. E. Wilson, R. R. Stearman, and R. L. Panton

246 Thermography as a Means of Blood Perfusion Measurement
J. E. Francis, R. Roggli, T. J. Love, and C. P. Robinson

250 A Biomechanical Analysis of Head Impact Injuries to Children
D. Mohan, B. M. Bowman, R. G. Snyder, and D. R. Foust

261 The Effect of Pressure on Skin Temperature Measurements for a Disk Sensor
S. D. Mahanty and R. B. Roemer

267 Ocular Tonometry Through Sonic Excitation and Laser Doppler Velocimetry
J. M. Hamelink and G. L. Cloud

271 Determining the In-Vivo Areas of Contact in the Canine Shoulder
P. K. Scherrer, B. M. Hillberry, and D. C. Van Sickle

279 Three-Dimensional Coordinate Data Processing in Human Motion Analysis
T. P. Andriacchi, S. J. Hampton, A. B. Schultz, and J. O. Galante

284 Fluid Mechanics of Longitudinal Contractions in the Small Intestine
J. G. Melville and N. Denli

289 The Stability of Blood Cell Suspensions to Small Disturbances in Circular Couette Flow: Experimental Results for the Taylor Problem
S. Deutsch and W. M. Phillips
